### Other Matters (agenda II (c))

### Committee Whole II

(afternoon session)

• Environmental

• disaster

• Environment

Thailand

• cross border

India: common but different responsibility

Sri Lanka:

China, Russia

Thanks Madam Chair

The delegation of Cambodia share concern about natural disasters encountered by the countries in Asia and Pacific, especially LDCs.

Disaster is obstacle to inclusive and sustainable development. Disaster affect social development, but leads to poverty.

The Kingdom of Cambodia held 23<sup>rd</sup> Natural Disaster Risk Reduction Forum in February 2013 to discuss inputs for the post 2015 framework on DRR. In this connection,

The Kingdom of Cambodia appreciated so far the technical assistance of the UNESCAP to the National Committee for Disaster Management in the field of DRR. (NCDM) and would like to request for assistance in DRR, particularly warning system.

Thanks ... Transfer of Technology

Disaster caused by climate change, or other factors is the issue of common concerns of the region and the globe. It is beyond the country capacity to deal with. Thus, Cambodia, like other LDCs,

request further technical assistance from the UNESCAP in the field of DRR, mainly related to warning system of disaster. Transfer of Technology integral for DRR ✓

Madam Chair, delegations, Better DRR helps but resilient society

Although countries try hard to deal with the disaster risk, assistance is highly needed. Cambodia is much appreciated the role play by UNESCAP in the field of DRR
